**Treatment** There is no specific antidote.

TREATMENT FOR FIPRONIL OVERDOSE: Recommendations for treatment are based on anticonvulsant therapy as routinely administered to humans. Phenobarbital or diazepam may be useful in controlling convulsions induced by Fipronil.

Even when symptoms of Fipronil intoxication are rapidly reversed by treatment, the treatment must be continued for several days, gradually decreasing the dose of anticonvulsant based on the patient's clinical response. This is necessary due to the slow elimination of the compound.

SECTION 5. FIRE FIGHTING MEASURES		
Flash Point	Not flammable or explosive	
Fire and Explosion Hazards	Under fire conditions, toxic, corrosive fumes may be emitted due to the presence of the active ingredient, fipronil.	
Suitable Extinguishing Media	Dry chemical, Foam, Water, Carbon dioxide (CO2)	

#### **SECTION 6. ACCIDENTAL RELEASE MEASURES**

General and Disposal	Wear appropriate gear for the situation. See Personal Protection information in Section 8.
Land Spill or Leaks	If spilled on the ground, the affected area should be scraped clean and placed in an appropriate container for disposal. Decontaminate tools and equipment following cleanup.

#### **SECTION 7. HANDLING AND STORAGE**

Handling Procedures	Keep exposed gel away from open food and food contact surfaces. Do not treat food preparation surfaces. Do not ingest.
Storing Procedures	Store in a cool, dry area. Keep out of reach of children and domestic animals. Keep away from direct sunlight. Avoid excess heat.
Work/Hygienic Procedures	Do not store, use, and/or consume foods, beverages, tobacco products, or cosmetics in areas where this material is stored.
	Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

### SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

**Engineering Controls** Use general ventilation to minimize exposure.

- **Body Protection** Chemical-resistant gloves made of waterproof material such as neoprene, butyl rubber, barrier laminate or nitrile rubber. Skin contact should be prevented through use of suitable protective clothing, gloves and footwear, selected with regard of use conditions and exposure potential.
- **General Protection**These recommendations provide general guidance for handling this product.
  Because specific work environments and material handling practices vary, safety
  procedures should be developed for each intended application. Waste resulting
  from these procedures should be handled in accordance with Section 13:
  Disposal Considerations.

Assistance with selection, use and maintenance of worker protection equipment is generally available from equipment manufacturers.
