EFFECTS OF OVEREXPOSURE:

See Product Label and Directions For Use for additional precautionary statements.

Causes moderate eye irritation. Harmful if absorbed through the skin. Harmful if swallowed or inhaled.

Avoid contact with skin, eyes or clothing. May cause shortness of breath, excitement, involuntary shaking, convulsions, irritability.

FIRST AID PROCEDURES

If in eyes: Immediately wash eyes with running water for 15 minutes. If irritation develops, consult a physician.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything to an unconscious person.

Note to physician: All treatments should be based on observed signs and symptoms of distress in the patient. Consideration should be given to the possibility that overexposure to materials other than this product may have occurred.

Symptoms of Poisoning:

In severe cases of overexposure by oral ingestion, lethargy, muscle tremors, and in extreme cases, possibly convulsions may occur.

Treat symptomatically. No specific antidote available.

Treatment for Fipronil Overdose:

Recommendations for treatment are based on anticonvulsant therapy as routinely administered to humans. Phenobarbital or diazepam may be useful in controlling convulsions induced by Fipronil.

Even when symptoms of Fipronil intoxication are rapidly reversed by treatment, the treatment must be continued for several days, gradually decreasing the dose of anticonvulsant based on the patient's clinical response. This is necessary due to the slow elimination of the compound.

SECTION VI - REACTIVITY DATA

STABILITY: This material is stable under normal handling and storage conditions.
